

HIGH QUALITY THREADS

Thread quality is fundamental to the construction, durability and strength of tactical equipment.

Two factors have a negative impact on the life Span of threads

1) Mildew is one of the most common factors in the deterioration of military kit, causing it to rot and ultimately results in unacceptable failure.

2) Sunlight has a harmful effect on the performance of threads, and over time causes their deterioration.

Warrior only uses the highest quality US Mil Spec nylon threads imported from the USA which are treated against both UV and Mildew.

- Fiber Resistance to Acid - Good
- Fiber Resistance to Alkali - Good
- Fiber Abrasion Resistance - Excellent
- Fiber Resistance to Heat - 142 deg C (Highest continuous temperature before breakdown)
- Fiber Melting Point - 265 deg C

MIL SPEC FABRIC

500D Nylon fabric feature enhanced tear and abrasion resistance, and long lasting durability, 500D Nylon fabric made with solution dyed yarns are inherently stain resistant and easy to clean. MultiCam, Coyote Tan, Ranger Green, Black and A-TACS FG fabrics are all I.R Treated for the lowest signature.
